REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Board of the School District of Westmoreland:

Herewith I have the honor to submit my third report as superintendent of your schools, it being the ninth in a series of similar reports since your district availed itself of the privileges of the supervisory district plan.

STATISTICS.—FALL TERM, 1910.

SCHOOL.	TEACHER.	Total Enroll.	Average Mem'sh'p.	Average Atten.	Per ct. of Atten.

There is some call from the people in Westmoreland for an approved high school. On this subject I wish to make the following observations. An approved high school in this state is a secondary school, the management of which conforms to the requirements of the department of public instruction and is adjudged by the head of said department to be of sufficient efficiency to come within the meaning of the term "high school" in the statutes. The list of approved high schools is made up yearly by the superintendent of public instruction from data gained chiefly from a detailed report which is yearly required from the school board or their agent, the superintendent of schools, by the department. The benefits derived by a district from having a school on the approved list are all the benefits which the law confers on districts supporting a high

school. In other words, an approved high school is the only high school that comes within the legal term "high school." Among these privileges are viz: A district supporting an approved high school is not liable for the tuition of a child residing in the district and attending an approved high school or academy in another district. It may receive pupils residing in a district not supporting an approved high school and collect tuition to the extent of \$40 per year from such district. The graduates from an approved high school may enter a New Hampshire normal school without examination.

In order for your district to establish an approved high school of a two year course the following conditions would have to be met: The high school would have to have a room separate from the grades; the entire time of one accredited teacher would have to be devoted to the high school pupils; one and only one schedule of studies could be offered to the students; if the sciences are to be taught, a laboratory with suitable equipment would have to be provided.

Through you, permit me to call the attention of the people of Westmoreland to the provisions of the statutes for paying the tuition of a child attending an approved school. Section 1, chapter 96 of the session laws of 1901 as amended by chapter 118 of the session laws of 1903 reads as follows: "Any town not maintaining a high school or a school of corresponding grade shall pay for the tuition of any child who with parents or guardian resides in said town and who attends a high school or academy in the same or another town or city in this state, and the parent or guardian of such child shall notify the school board of the district in which he resides of the high school or academy which he has determined to attend; provided, however, that no town, etc." I do not wish to attempt to interpret the clause which provides for the notice to the school board so as to say whether it is mandatory or obligatory. This much is certain, that in a specific case, if the school board do not receive notice of the intention of the parent or guardian and do not include the amount necessary in their estimate of the funds needed for defraying such obligations, they can not lawfully au-

thorize the payment of the tuition out of the funds available during that fiscal year.

Permit me to call your attention to the fact that in the place of the one school at the Corners, we have for the past year supported two schools, one at Poocham and one at the Meadows, at about the same expense that the one was run last year. Still the fact remains that the expense of educating the pupils in these schools is from two to three times as great per capita as in any other school in the town. Though the plan of running two schools instead of the consolidated school at the Corners may be the more advantageous, yet, I should like to see a better solution of the problem of furnishing school facilities to that dozen of children.

I believe that the work in general in our schools this year has been a little more effective than it was last year, in fact, I believe that there has been a steady improvement for the past three years.

With sincere thanks to the board for their cooperation, support, and confidence, to the teachers for their earnestness and loyalty, and to the people of Westmoreland for their hospitality, this report is respectfully submitted.

LOUIS DEWITT RECORD,

Supt. of Schools, Walpole-Westmoreland-Langdon Supervisory
District.
